Mr. Hill,

This email will provide access to revised emission calculation spreadsheets in a readable format, as well as a single document that includes the final STEERS reports for each of the 5 emissions events and the amounts of individually speciated compounds for each event. These are being submitted to you as part of the above-referenced response to Harris County Pollution Control Services Department that I sent you yesterday afternoon.

Please let me know if you have any questions or have trouble accessing the referenced documents.

Chris
